

# ALLAWAY ACOUSTICS

**DESCRIPTION** TRANSHIELD is a high performance, acoustic and thermal insulation material that offers the noise reduction characteristics of spaced barrier systems with the advantage of single stage application.

**APPLICATION** TRANSHIELD insulation is generally used to improve the sound transmission loss of ventilation ducts and mechanical equipment enclosures.

**SPECIFICATION** TRANSHIELD specification overleaf.

### SOUND REDUCTION INDEX (dB)

-  0.8mm SHEET STEEL/TRANSHIELD
-  0.8mm SHEET STEEL.
